LA Fitness
Anne’s Choice

Education

UC San Francisco
Temple University
University of Illinois
University of NY
Michigan State

Other

Sugarhouse Casino
Firekeepers Casino
Iowa Clinic
Chick-fil-A
Camp Pendleton

This is our 10th year supplying state of the art LED solutions featuring high lumens, low wattage, and properly thermally managed systems that interface with a variety of control systems, emergency systems and sensors as manufactured by others.

All our fixtures are built to full compliance for indoor and outdoor use with the UL & ETL 1598, 8750 & 924 safety standards for USA and Canada.

A substantial portion of our products are Made in USA and we strive to limit our overseas purchases to only those parts not available as Made in USA. Our warranty against defects and workmanship is comparable to those offered by our industry leading companies.

Eclipse is a member of IES, and supporter of Dark Sky, Green Build, Lighting Facts, DLC, and Energy Star.

Solid State lighting (SSL) is a rapidly changing and evolving technology. Our products are continuously being upgraded with newest light engines and drivers to keep up with the rise in lumens per watt and advancements with programmable drivers, color tune-able systems and changes to sensors including preparing for the future that will include Wi-Fi and light over the internet.

Follow us at www.eclipselightinginc.com for our latest and most up to date information

If you are current or past user of Eclipse Lighting Inc. products we appreciate your support. If you are a potential new customer, we welcome the opportunity to serve you as we have served our clients these past 30 years.
