

Scalable Solutions

Facilities Management Software

Challenges and Opportunities

In today's ever-changing world, maintaining efficient and cost effective building operations is a widely recognized necessity. However, the challenges that you face as a facilities manager can be numerous. Space, personnel, and asset management; on-demand maintenance requests; and access to accurate, up-to-date floor plans are just a few examples. Decreased staff and budgeting resources only magnify these difficulties. Let Cadapult FM provide you with a turnkey solution to improve your company's workflow and reduce building operation costs.

Make it Integrated

Our innovative solutions automate workflow to enhance communication and streamline activities to optimize resources. We deliver customer satisfaction through increased accessibility, productivity, and profitability through Web, Database, AutoCAD, and Revit tools. Cadapult FM addresses functions like space, personnel, assets, leases, work orders, and preventative maintenance, while linking with other systems, such as your HR program. This integration eliminates entry of redundant and inaccurate information, providing the highest level of accuracy and data integrity.

Keep it Simple

Cadapult FM has been providing facilities management solutions to small, medium and large corporations, government agencies, healthcare facilities, and other institutions since 1985. Our easy-to-use, low-cost solutions can be installed on your servers or hosted from ours. Modules may be purchased individually or as an entire suite, which may be implemented in less than a month. This combination of software and implementation methodology maximizes your return on investment.

FM Access Anytime, Anywhere

The Cadapult FM Cloud provides real-time access to your current facilities information from various devices through a secure connection to the internet. Our cloud solution can also expedite the implementation process, eliminating the time-consuming process involved in using internal IT resources for initial execution or ongoing update support. Software updates are automatically applied to your cloud solution through our highly qualified technical staff, keeping you up-to-date with the latest innovations developed to meet today's ever changing technological landscape.

AutoCAD® Integrator
Revit® Integrator

Web Solutions:

- Space & Personnel
- Asset & Inventory
- Floor-Plans & Reports
- Move Management
- Lease & Real Estate Management
- Preventative Maintenance
- Work Orders
- Facilities Assessment
- Room Scheduling

AutoCAD®/Revit® Integrator Suite

The Cadapult FM AutoCAD/Revit Integrator Suite provides a hybrid solution that allows clients to leverage the floor plans and 3-D models generated through AutoCAD and/or Revit separately or simultaneously.

Manage space, personnel, and assets more efficiently through seamless bi-directional database integration. Generate numerous graphic queries and reports and integrate with our other FM applications and internal systems. Track unlimited amounts of data through user-defined fields.

Revit allows you to take advantage of building information modeling (BIM) and sustainable design in designing and managing your facilities. Seamlessly integrate with other Cadapult FM applications to enhance coordination between architect, builder, and facilities manager.

Web Floor Plan & Report Viewer with Data Editor

Communicate and manage unlimited, password protected data on space, personnel, and assets throughout your company. View vacancies, cost centers, and other graphic queries without AutoCAD or Revit. Generate standard reports on space and personnel or customize reports according to your needs.

Live View adds real-time search and graphic capabilities to your floor and property plans. This app allows users to generate their own custom graphics queries on the web, in the same way AutoCAD users have been doing for years, and allows printing or saving to PDF of other image files. Searching for a specific staff member, conference room, or asset across your entire portfolio of buildings is accomplished in seconds and displayed on an up-to-date-floor plan.

Web Asset & Inventory Manager

Track your assets and assign them to locations within your buildings or warehouses. Generate detailed and summary reports. Carry out complex asset moves in a timely, more efficient manner.

Web Move Manager

Streamline the workflow process for effective single and domino move management with automatic conflict resolution and department notification. Access move requests, approvals, schedules, vacancies, in-process work orders, and closed work-order history. Reduce costs and company disruption and always ensure up-to-date floor plans.

Maintenance Work Order Request Manager

Requesters, managers, and technicians can process daily maintenance requests in a few simple steps. This module improves overall maintenance operations through priority status assignments, response time tracking, and accurate cost analysis.

Web Preventative Maintenance Manager

Plan and budget for ongoing maintenance costs and activities to avoid costly repairs. Create single and recurring tasks to process work-orders and track parts and labor more efficiently.

Web Lease & Real Estate Manager

Manage real-estate portfolios more efficiently so that you can make better business decisions, mitigate risk, and enhance communication and performance. Tenants and real-estate service providers can view critical data anytime and anywhere over the web.

Web Facilities Assessor

Survey, assess, and locate deficiencies in your facilities' architectural and engineering systems. Prioritize projects and costs and plan for corrective measures.

Web Room Scheduler

Schedule meeting facilities that accommodate your specific requirements, such as capacity, availability, equipment, and supplies. Request single or recurring events, room layout reconfiguration, and audio-visual coordination. Integrate with Microsoft Outlook.

What our clients say about us

“ Cadapult has streamlined our space allocation process, giving us the necessary tools to provide the information to all who require it in a comfortable format. My job has become so much more efficient that I no longer dread compiling those quarterly reports! Cadapult FM effortlessly provides the same data in half the time! ”

Gina Naccarato-Reed | Sr. Facilities Planner | Independence Blue Cross
