

Our Systems... designed for Entrapment Protection.

AGV Bumpers: We offer a custom line of Automated Guided Vehicle bumpers designed to fit your specified requirements. These cushioned sensors easily mount to the sled and when contact is made it sends a signal to the operator to stop the vehicle.

Guardian Mats®: Our custom fabricated pressure sensitive mats designed for Area and Perimeter guarding. These mats can be manufactured to meet your specific size and shape, and are available in your choice of Broom Sweep or Diamond Top overs in Black or Yellow.

Accessories: We have a full line of accessories including Air-Wave Switches, Controllers, Motion Sensors, Cords, Retracting Reels, Interface Modules, Junction Boxes and more.

Our Locations: We have two manufacturing and sales offices to better serve you.

- Our West Coast Facility in Tempe, AZ
- Our Headquarters in West Grove, PA

“Making Your World A Safer Place!”

Welcome to Miller Edge... the leading provider of Safeguarding Solutions for the Warehouse and Cold Storage industries.

For over 70 years, Miller Edge has been designing and manufacturing safeguarding solutions to meet the needs of our customers.

Our focus... is on safety! We believe safety starts at the front entrance of your warehouse or storage facility and follows through to your shipping docks. We pride ourselves in providing the best safeguarding solutions available.

Miller Edge... understands the challenges faced in Warehouse Distribution Facilities projects and is committed to providing innovative solutions that not only reduce overall project costs, but also increase safety, promote sustainability and even improve cash flow. Whether it's labor-saving custom-designed commercial door and gate safety systems, DIY products, online design tools or immediate access to our world-class engineering department, Miller Edge can help bring commercial and institutional warehouse and large facilities maintenance projects in on time, within budget and profitably.

How do you benefit... when partnering with Miller Edge?

- Reduce the chance of accidents in the work place, providing a safer environment for you and your employees.
- Reduce costly down time due to a stop in production.
- Rest assured that you are providing the best, affordable solution to your safeguarding needs.
- You can Count on Miller Edge to stand behind our products and provide you with the service you deserve.

"Our customers are our #1 concern!"

Miller Edge Systems... designed for Entrapment Protection.

Door Edge Sensors: A cushioned sensor that attaches to the leading edge of a motorized door, that activates when it comes in contact with an object or person, and sends a signal to the door operator to stop and/or reverse its motion.

Non-Contact Door Edge Sensors: A photo eye sensor that attaches to and travels with a motorized door, that activates when the beam is broken with an object or person, and sends a signal to the door operator to stop and/or reverse its motion.

Photo Eyes: We offer a wide range of Photo Eye products that can be used on entrance gates or on motorized doors. These eyes use a thru-beam technology, which once the beam is broken it can be set up to signal the operator to stop and or reverse the action of the door or gate.

Wireless Transmitter and Receivers: Our gate and door edge transmitter is designed to eliminate the need to hard wire sensing edges to motor controls. When the Sensing Edge comes into contact with an obstruction, a closed circuit signal is created and is sent to the transmitter. The transmitter relays the signal to the receiver that is wired to the stop or reverse terminals in the motor controls.

What you can expect to receive... when you partner with Miller Edge.

- A personalized sales representative who will be there to provide you with expert product knowledge and answers to your specific needs.
- An award winning customer service team that is dedicated, willing to listen to your needs and see that they are met, on time.
- A full service Engineering team offering years of experience in innovative problem solving design solutions.

Product Applications:

- Sectional Doors
- Rolling Steel Doors
- High-Speed Doors
- Swing Gates
- Barrier Gates
- Vertical Lift Gates
- Sliding Gates
- Area Guarding
- Perimeter Guarding
- Automated Guided Vehicles
- Freezer Doors
