

Smart Energy. Smart Business

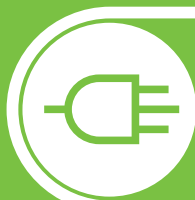

Device Level Energy Management Solutions

Panoramic Power is the leading provider of device level energy management solutions. Using wireless, self powered sensors, coupled with a cloud-based analytics solution, we enable businesses to optimize their energy consumption and improve system level performance and operations.

Panoramic Power delivers a powerful enterprise solution to organizations across a wide range of industries, helping them strategically align people, processes, and technology with financial, operational, and environmental objectives.

Panoramic Power delivers an ROI for customers with an enterprise solution that is affordable, flexible and scalable enough to deliver a comprehensive set of energy management and operational services which also support corporate social responsibility and sustainability programs.

Panoramic Power delivers a powerful enterprise solution that enhances facility operations, improves production performance and reduces energy waste.

Energy Efficiency

Reduce energy expense and carbon footprint via real time, device level actionable energy insights.

Operational Efficiency

Use device level energy consumption data to reduce maintenance costs by preventative and predictive maintenance.

Preventive Maintenance

Identify unseen problems and predict failures through real-time alerts to ensure equipment optimization and effectiveness.

Active Device-Level Monitoring: Saving Money on Energy, Maintenance and Operations

Only Panoramic offers real-time circuit-level energy measurement that gives you unmatched visibility, actionable analytics and real-time dashboards and reports, enabling you to make informed decisions on how to reduce energy, maintenance and operation costs, and to improve facility performance.

With Panoramic Power, customers can:

Cut Costs, Expand Margins and Increase Profitability with Energy and Operational Efficiency. Panoramic Power delivers real time energy waste alerts, optimized energy usage profiles and peak demand and preventative maintenance failure detection.

Enhance Facility Operations. Ensure equipment optimization and effectiveness with predictive/ conditioned based maintenance, live equipment status monitoring and unit/ device benchmarking.

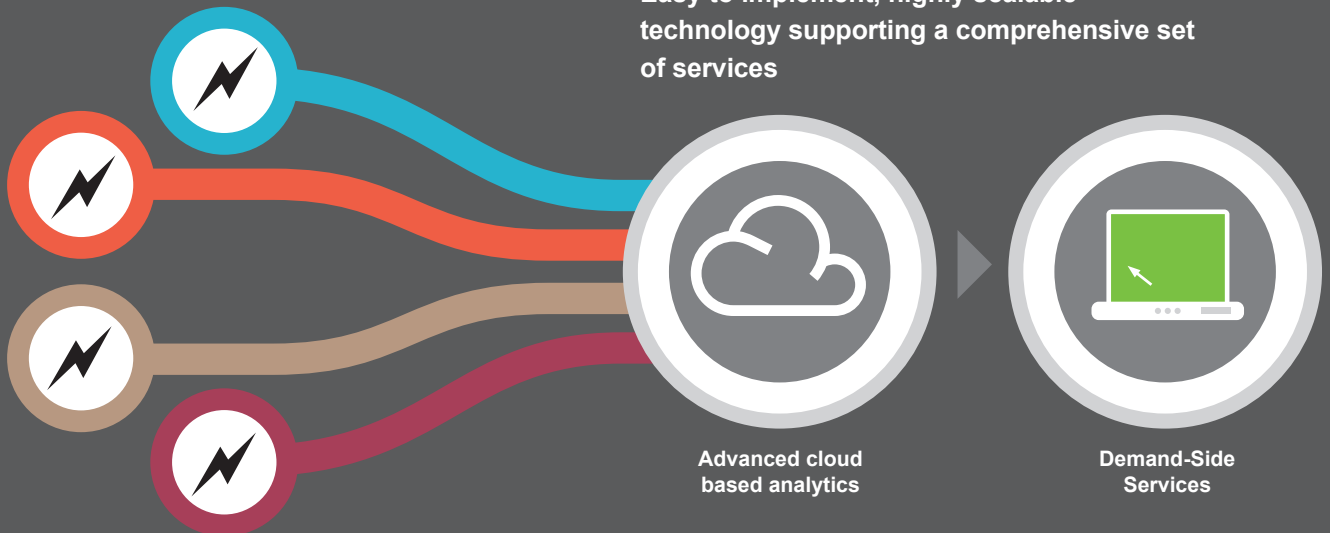

Enhance Brand Reputation and Sustainability through Green Data. Support your corporate social responsibility, maximize ROI of green initiatives and optimize sustainability programs.

Industries Served

- Merchandise Retail
- Manufacturing
- Food Services
- Healthcare Facilities
- Food Retail
- Education Commercial Buildings

Easy to implement, highly scalable technology supporting a comprehensive set of services

Scalable device-level visibility

Advanced cloud based analytics

Demand-Side Services

Different industries are powered and empowered differently. Because Panoramic Power has experience across many sectors, we can tailor our solutions to meet each industry's specific energy management needs and optimization opportunities.

We have helped hundreds of companies from virtually every industry. Whether you are in the multi-site retail business, industrial manufacturing, healthcare, higher education, facility management, or any other industry - we have solutions that can produce measurable results by tracking and monitoring devices, predicting and optimizing systems, providing alerts and insights, and improving your overall operations.
