

Generator Service, Maintenance & Installation

PRODUCTS & SERVICES WHEN YOU NEED THEM, WHERE YOU NEED THEM

Why Power Plus?

When you hire Power Plus to service your generators, you are choosing a Nationwide partner who services all makes and models including Cat, Cummins, Detroit Diesel, Generac, Kohler, Katolight and John Deere. Power Plus saves you time and money fulfilling your need for a Single Call Service Center for all of your critical power needs:

- One phone call to coordinate generator servicing for multiple manufacturers
- One phone call to coordinate servicing for your generator to minimize outage time and maintenance windows
- One Toll Free phone number for scheduling and emergency calls: 24 hour coverage, 365 days a year
- One call for National coverage
- Customer Portal for Scheduling, Invoicing and open Quote Review.

Sales and Installation

We offer a full line of generators and automatic transfer switches for multiple manufacturers. Power Plus can provide a full turn-key installation package for your generator and ATS needs to meet your local building codes, National Fire Protection Agency, and Air Quality Control measures. Power Plus Can procure the right generator to meet your system requirements.

Load Bank Testing

We provide load bank testing for generators of all sizes from 1KW up to 4 megawatt, including parallel units. Load bank testing ensures that your unit will perform at full load, prevent against "wet stacking" carbon buildup, and comply with local and state operating regulations. After each load test we will provide documentation verifying the performance of the unit at variable loads.

EPA Compliance

Power Plus provides solutions for the ever evolving EPA and air quality measures by providing professional installation of diesel particulate filters and catalyst systems per manufacturer specifications. We assist with compliance logs, reporting, and run time documentation. Proper disposal and recycling certificates for non-consumable waste is also a priority of Power Plus.

Additional Services

- Flexible, maintenance contracts to meet your specific requirements
- Coolant, Fuel and Oil analysis for predictive maintenance
- Fuel Treatment and Polishing down to 2 microns for up to 50,000 gallons of fuel
- Website Customer Portal with access to service reports, scheduling, and remedial repair quotes with comprehensive analysis and photographs of parts to be repaired or replaced.
- Full capacity for all major repairs including engine rebuilds and generator rewinds.
- Nationwide fueling
- National generator rental coverage for units down or disaster relief
- Complete Electrical Testing of switchgear and sub-panels including Power Analysis, Meggar Testing and Thermo Imaging

Additional Services

Power Plus is your source for all power generation needs. Our Power Solutions Division offers services on generators from 1 kW through 4,000 kW. We have service contracts for equipment produced by every major manufacturer in the generator and firepump business. Our technicians are trained and experienced in every aspect of the power generation industry. Power Plus is proud to be your only source for your emergency systems before and long after the sale. This means we are a full service, one stop, generator power solution provider.

Our product service offering includes engines manufactured by Mitsubishi, Cummins, Detroit, and John Deere, as well as AC generators made by Marathon Electric, Stamford Newage, Leroy Somer and Kato. Power Plus' commitment to quality in the power solution generation field ensures a reliable emergency system when you need it most.

Our experience in emergency, peak shave, co-generation prime power emerging technologies provides a single source for design engineering assistance, maintenance and equipment for these complex systems. We understand the importance of your generator systems and are equipped to fully support all your power generation needs.

Our fleet of portable rental power generators is fully complemented with disconnect switches and distribution panels. We have the ability to support practically any power need, and set up service is always available. We provide 24/7 emergency service for all your critical power needs.
