

Too hot?

Lowering the Cost of High Ceilings™

Too cold?

ZOO Fans will make it just right!

Without ZOO Fans

With ZOO Fans

ZOO Fans gently mix the air, eliminating hot and cold spots. The temperature at floor level is much more comfortable and the HVAC systems run less.

Why choose ZOO Fans™?

Small fans, BIG savings! Dollar for dollar, ZOO Fans are the most efficient and effective small destratification fans on the market. Rigorous independent testing proves that ZOO Fans use less energy to blow more air than the competition—that means fewer fans, lower installation costs, and lower operating costs.

Keep 'em safe, make 'em happy. Warm-up the floor and help keep it dry, reduce condensation on equipment, eliminate hot and cold spots. Relaxed, comfortable people work more, play more, buy more—and smile more!

Fast Payback. ZOO Fans create even temperatures from floor-to-ceiling and wall-to-wall that make it easier to heat or cool. HVAC systems run less and energy costs go down. Noticeably improve comfort and watch productivity and sales increase. Typical payback periods of 1-3 years, with most ROI less than 2 years.

Be Green. Improve internal air circulation and use less ducting in new construction, use less energy in new and existing facilities, and repair and replace HVAC equipment less often—all good ways to reduce carbon footprint. Visit our website to see the many ways ZOO Fans can contribute to LEED®.

These fans go where others won't. They're easy to install around obstructions, from lighting to overhead cranes. The directed column of air is perfect for aisles or avoiding sensitive areas, and ZOO Fans' enclosed housing will never cause a strobe effect with lighting or interfere with fire suppression equipment.

Improve air circulation in most any building—heated, air-conditioned, or not conditioned at all.

goes UP

What's your Zone Of Occupancy?

Energy costs
go DOWN

Open Ceiling

- > Ceilings from 12' to 95'
- > Works great in aisles!
- > Built to hardwire, or choose 6' cord and plug
- > Manual or BMS variable speed control
- > Concise column of air is easy to direct
- > Third-party tested in an AMCA-certified lab
- > Innovative, patented blade design delivers unmatched efficiency and performance
- > Includes fast-locking hardware for quick and easy installation—6X faster than traditional methods

Drop Ceiling

- > Ceilings from 8' to 50' and above
- > Blends seamlessly with existing fixtures
- > Quiet operation, Energy Star® rated motors
- > Manual or BMS variable speed control
- > Does not interfere with existing HVAC
- > Air purification options include:
 - > Filtration for molds and particulates
 - > Ultraviolet Germicidal Irradiation (UVGI) for most germs, bacteria and VOCs
- > Eliminates the need for space heaters
- > Specially designed acoustic package available for silent operation in sound-sensitive settings

Spot Cooler

- > Provides relief from the heat
- > Focused, easy-to-direct column of air
- > Quiet and efficient operation
- > Disperses concentrated heat
- > Reduces condensation
- > Safety grill on intake and exhaust
- > Variable speed controllable for individual comfort
- > Ideal for assembly areas, fitness clubs, check-out stands, and workstations

Where to Consider ZOO Fans

- > Grocery Stores
- > Warehouses | DCs
- > Hangars
- > Auto Sales & Service
- > Fleet Maintenance
- > Gymnasiums | Athletic Facilities
- > Big Box Stores
- > Manufacturing
- > Offices, Theaters, Auditoriums
- > Medical Clinics | Hospitals

Easy to Control

- > Operate individually or together in zones
- > Available BMS Integration
- > Variable speed control allows fine-tuning of airflow for ceiling heights from 8' to 65' or more, ensuring comfort and performance

Made Right

- > Built with BAT (Best Available Technology) for high efficiency
- > Independently tested
- > ETL approved
- > Proudly designed, engineered and assembled in the USA under ISO 9001:2008 Quality Management System

Find out how easy and cost-effective it is to lower the cost of high ceilings.
