**SMART SOLUTIONS FOR
SMARTER FACILITIES**

CUSTODIAL

- ▶ Save big on custodial services with the cloud based machine learning platform and smart sensors that facilitate on-demand service and optimized work order.
- ▶ Save money and increase your revenue with effective utilization of materials with smart inventory management.

Save Time

Do not worry about your custodial staff wasting time in fixed routes and a fixed schedule to service your facility.

Power of Automation

Zan Compute's intelligent solutions enable your garbage bins, paper towel and soap dispenser to communicate with your staff about their need for service.

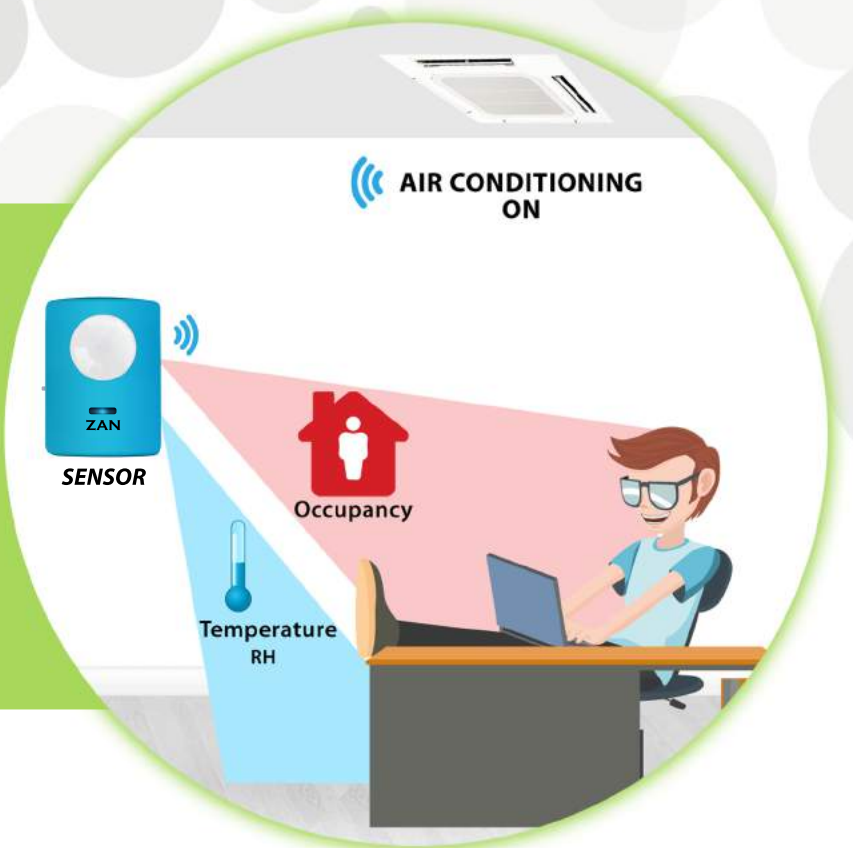

Zan Compute UI - Floor Map

Receive a notification that one of the garbage bin is full and deploy your crew on demand.

HVAC

- ▶ Why should you heat or cool an unoccupied area in your building?
- ▶ Zan Compute's Intelligent solutions enables you to restore temperature balance in your zones and minimizes the need to temperature control in unoccupied areas.

Save Energy

Save big on your energy cost with Zan Compute's HVAC smart sensors and cloud based machine learning platform.

WATER CONSERVATION

- ▶ Do you know how much water is wasted in bathrooms in the building?
- ▶ Save water and save the world with Zan Compute's Intelligent solutions smart sensors and cloud based machine learning platform.

Detect Water Leaks

Are you aware of water leaks in the building, before people start noticing and complaining about it? Zan Compute's intelligent solution provides you insights into your water usage and proactively warns you of any potentials leakage and overuse.
