Your primary, supplemental and emergency air conditioning problems are solved with AirPac's unique, feature-rich portable air conditioning systems.

COOLIT3300: 2.3 tons

Network Control Room

Computer and Telecommunication Facilities

Heat is the number one enemy of communications equipment, computer systems and data. It can shut you down in an instant.

AirPac's reliable units roll into place in minutes providing the cooling power and redundancy needed to keep your business running and reduce costly down time.

COOLIT2600: 1.1 ton

Retail Store

Retail and Restaurant Spaces

A hot dining room is not inviting for customers. Uncomfortable shoppers mean less revenue. Air conditioning is the answer for temporary cooling for store fronts with high intensity lights, dressing rooms, dining areas and hot kitchens.

AirPac has portable air conditioners from one-to 20-tons. Use one or combine units in tandem for larger cooling loads.

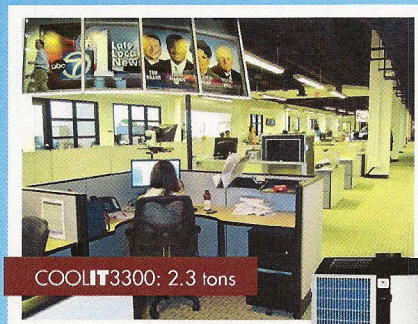

COCH: 12 tons

Tented NY Wedding

Outdoor and Special Events

You can't control the weather. You can control the temperature in your tented event with AirPac's temporary HVAC and portable air conditioners. The slim, unobtrusive cabinet design allows for easy set-up. You'll be cooling minutes after the units are set in place. You've created the magic; don't let it melt.

Outdoor spot cooling is possible with AirPac's portable air conditioners. For heat relief at outdoor festivals or spot cooling for athletes at sporting events, AirPac has a portable air conditioner to cool your hot spot.

COOLIT3300: 2.3 tons

Office Space

Offices and Conference Areas

In today's ever-changing office environment, your building's air conditioning system may no longer meet your needs.

Your temporary cooling problems are solved with AirPac's portable air conditioners. Units fit through doorways and on elevators and are quick and easy to install.

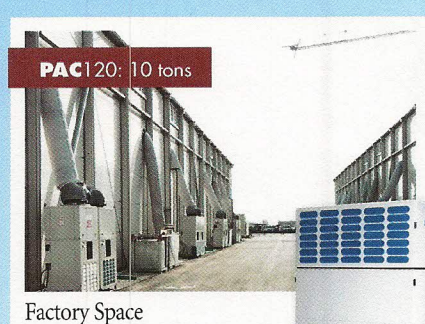

PAC60: 5 tons

Hospital Kitchen

Military and Institutional

Air conditioning is often required year-round for many military and institutional applications. Today's energy-efficient environments and heat-sensitive equipment require conditioned air.

AirPac's reliable air conditioners stand up to demands for constant cooling. Our systems are easy to use and install, saving you time and money.

PAC120: 10 tons

Factory Space

Laboratories and Factories

Excessive heat causes equipment failure and can compromise lab test results. Factory processes may need localized cooling for heat-generating equipment.

Whether you need cooling for a temporary lab or during a planned shut-down of the central air conditioning, AirPac offers you unequalled flexibility.
