ABOUT THE CONFERENCE & EXPO

There is no other place that brings together all who impact the built environment to find solutions. Join us as innovators share ideas, initiatives, practices, and policies to optimize building performance and sustainability. Don't miss a compelling program that focuses on a new topic each day--resilience, technology, and workforce. Visit buildinginnovation.org for the full schedule.

RESILIENCE

These sessions will focus on the resilience of the nation's building stock, covering the built environment as it relates to climate change, natural hazards, and sustainability.

TECHNOLOGY

These sessions will showcase advanced technologies and practices, highlighting how the industry can best prepare for their adoption and deployment.

WORKFORCE

These sessions will highlight this critical challenge for the industry, as well as opportunities for advancing the building workforce to meet 21st century needs.
